Index 1962

Index to editorial articles appearing in Iron Age Metalworking International during 1962

Automation
Computers Affect Metalworking, Aug p 11
Electric Hand is Versatile, Nov p 17

Brazing
Ultrasonic Vibrations Solve Soldering and Tinning Problems, June p 26

Coatings
Automatic Line Molds 800 Brakedrums per Hour, Dec p 18
Low-Cost Foundry Mechanization, Nov p 24

Ceramics
More Complex Designs With Preformed Ceramic Cores, Apr p 28

Cold Forming
Cryogenic Forming: New Process Stretches and Strengthens, Jan p 11
Flow-Spinning is Economical for Large Cylinders, Sept p 23
Light Swedish Press Exerts Heavy Force, Nov p 28
New Techniques In Metal Forming, June p 13
Six New Equipment Ideas For Makers of Strip and Wire, Apr p 10
Water-Punch Forms Sheet Metal, Aug p 26

Cryogenics
Cryogenic Research Around the World, July p 15

Extrusion
Coextrusion Includes More Materials For Industry's Demands, Mar p 30
New Techniques in Metal Forming, June p 13
Unusual Machines For the "Hard-to-Work" Metals, Mar p 13

Fabricating
A Fast Way to Punch Holes, July p 22
New Adhesive Replaces Welding, Mar p 22
Numerical Controls Make Flame Cutting of Plate Automatic, Jan p 29

Forging
Corrugated Steel Forgings, Sept p 36
Digital Controlled Forging Press, Nov p 18
New Techniques In Metal Forming, June p 13
Roll Forging Speeds Ring Making, Jan p 34
Unusual Machines For the "Hard-to-Work" Metals, Mar p 13

Foundry
Connecting Rods Now Are Cast, Aug p 19
Large Cyclotron Magnet Yoke Is Made of Steel Castings, Sept p 15
More Complex Designs With Preformed Ceramic Cores, Apr p 28
Shooting Chips into Cupola Furnace, Aug p 32
Tape Adds Trace Elements to Iron Castings, Oct p 26

Heat Treating
Bright Annealing of Small Bore Tubes, Oct p 14
Computer Controls Unusual Furnace, Jan p 22
Electric Stress Relief Furnace Is Low In Cost, Feb p 22
Heat Treat in Two Atmospheres, Sept p 22
High Speed Steel Strip Annealing, July p 36
Humber Improves Output, Quality With New Heat Treating Units, Aug 1962 p 28
New Coating Reduces Oxidation of High Temperature Alloys, July p 33
New Process Gives Carbon Steel Some Properties of Stainless, Feb p 16

Hot Forming
New Techniques In Metal Forming, June p 13
Unusual Machines For the "Hard-to-Work" Metals, Mar p 13

Inspection
Neutrons: New Inspection Method, Mar p 16
Radiation Changes Metals, June p 32
Sound Gages Thickness of Tube, Jan p 33
X-Ray Beam Records Thickness, Dec p 17

Instrumentation
Atomic Tweezers—The Microprobe Analyzer, Apr p 26

Joining
Hermetic Seal Joins Metals, Nov p 23
Pressure Bonding Speeds Electrical Joining, June p 24
Resistance Welding Machine Applies Gear Blanks to Shafts, Mar p 32
Sealant Secures Assemblies, Oct p 18

Lubrication
Can Modern Science Avoid Wear? May p 30
Fire-Resistant Lubricant, Dec p 39
Heavy Objects "Float" on Air Bearings, June p 30
Molybdenum Disulfide Lubricants: Which Type Should You Use? Apr p 30

Machine Tools
Automatic Drilling Machine for Hard Materials, Mar p 34
Bores, Taps, Mills in One Set-Up, Jan p 36
Electro-Erosion Drills Small Holes, Apr p 13
Grooves Formed by Plunge Grinder, Apr p 24
Machine Tools: 1962, Dec p 11
Report From Brussels: Outstanding New European Machine Too's, Jan p 13
Standard Machine Tools Make up an Automatic Line, Apr p 22
Three Broaching Operations in One, May p 20

Machining
Analog Control Cuts Set-up Time for Duplicating Lathes, Sept p 18
Automated Etch Marks Tools, Sept p 25
Calculating Job-Shop Costs, July 1962 p 18
Coolant Pumps For Metalworking Plants, Oct p 22
Copying Device Produces Accurate Hemispheres, Nov p 26
Electrochemical Machining Unit Handles Varied Production, Nov p 20
Electrolytic Process Speeds Sharpening of Carbide Tools, June p 19
Grooves Formed by Plunge Grinder, Apr p 24
High Machine Brings Bores to Size, May p 21
How to Improve Tool Life In Drilling Carbon Steels, Feb p 14
Improving Tool Life by Ultrasonic Vibration, Mar p 25
New Coating Process Suggests Way to Improve Tool Life Mar p 20
New Techniques In Machining, Oct p 11
Punch Press Broaches Parts, June p 25
"Quality Assurance": One Way to Better Products, July p 28
Reversing Control Cuts Planer Time, July p 17
Special Fixtures Reduce Lead Time, June p 28
Standard Machine Tools Make Up an Automatic Line, Apr p 22
The Laser: What It Means to Metalworking, Nov p 15
Tracer Guides Lathe, Oct p 25
Transfer Machine Finishes Crankshafts in 30 Seconds, Nov p 42

Management
Control Tool Paces Management, Oct p 28
How Spanish Shipyard Cut Costs And Trained New Workers, Jan p 18
International Standards System Coordinates Inch, Metric Units, Sept p 30
Management Compensation in Western Europe, June p 16
New Data Unit Controls Production, Apr p 21
Practical Adaptation of the Metric System, Dec p 26
The Joint Venture as a Means of Increasing International Trade, May p 26

Material Handling
Belt Conveyor Twists en Route, May p 28
System Stores and Recovers Parts, Jan p 32

Materials
New Iron-Aluminum Alloy, Oct p 27
Stainless-Clad Aluminum Has Wide Market, July p 38
Tests Throw New Light On Bearing Materials, Feb p 18
The New Science of Materials, May p 13
Wire Gains New Personality, Dec p 22

Metal Finishing
Blast-Cleaning Structural Shapes, Feb p 36
Brush-Type Electroplater Plates without Electrolytic Bath, Apr p 18
Continuous Metallizing, July p 30
Deep-Dip Finish for Car Bodies, Oct p 21
Galvanized Sheets Improved by Magnesium Additions, May p 22
Mischmetal Additions Improve Aluminizing, Oct p 30
New Solvent Cleans Metals Safely, Sept p 20
Nickel-Ball Anodes Aid Plating, Jan p 42
Pure Nickel Reduces Plating Costs, Aug p 16
Sonic Agitation Cleans Large Industrial Parts, Dec p 24
Superior Finishes With Nylon Polishing Belts, June p 35

Metallurgy
Automatic Polishing of Metallographic Samples, Oct p 24
Metallurgists Report Progress in Forming Beryllium, Feb p 32
Porosity Is a Beneficial Factor In New Cellular Metals, Apr p 14
Rotary Displaced Electrode Speeds Electro-Erosive Drilling, Aug p 22
Strips Rolled in Vacuum Mill, May p 25

Plastics
Plastics Fight Wear With MOS2, Oct p 16

Powder Metallurgy
New Powder Metallurgy Process, Aug p 14
Water Shapes Metal Powder Parts, Jan p 27

Power Transmission
Ball Bearing Screws Resist Heat, Mar. p 26

Rolling
Epicycloidal Rolling Speeds Tube Production, Feb p 20
Unusual Machines For the "Hard-to-Work" Metals, Mar p 13

Stamping
Punch Press Handles Complex Operations, Nov p 22
Theoretical Formability: New Light on Sheet Metal Forming, Feb p 29

Steelmaking
A Selective and Automatic Blast Furnace Charging System, May p 18
Blast Furnace Tests Prove Advantages of Coal Injection, Aug p 30
Carbon Block Builds Subhearths, Aug p 25
Computer Controls Billet Cut-up Line, Sept p 26
Continuous Steel Casting Shows Remarkable Progress, Feb p 8
Grooves Formed by Plunge Grinder, Apr p 24
High Speed Steel Strip Annealing, July p 36
Hot Peeling Machine Conditions Ingots in 6 Minutes, Mar p 28
How to Stop Erosion of Ore Stockpiles, June p 23
Ingot Grains are Refined By Magnetic Stirring, Apr p 16
Modern British Tinplate Line Is Built for High Output, Nov p 30
New Drill Taps Blast-Furnace, Sept p 17
New Steel Chimneys Tame Draft, July p 20
Oxygen Plus Fuel Injection Improves Blast Furnace Output, Jan p 24
RTB: World's Newest Steel Works, Dec p 28
Two New Tube Mills Increase Production, Nov p 36
West Africa Is Scene of Big Iron Ore Projects, May p 32

Welding
Automatic Vertical Welding, Aug p 20
New Gas-Shielded Tungsten-Arc Welding, Mar p 18
New Ideas in Welding Malleable Iron, Feb p 12
New Machine Makes Welded Beams, Jan p 16
Numerical Controls Weld Irregular Forms Economically, Dec p 20
Projection Welding Machine Fabricates Steel Furniture, May p 16
Projection Welling Simplifies Bearing Production, Sept p 28
The Laser: What It Means to Metalworking, Nov p 15
Transfer-Line Production of Welded Contacts, July p 26
Welder Follows Contour, Nov p 29

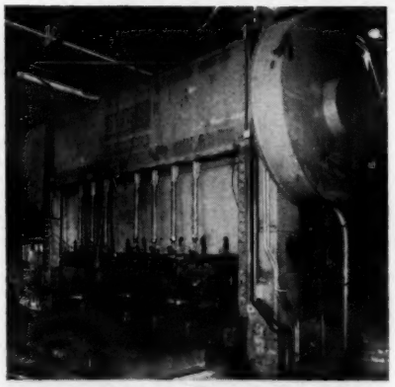
BIG PRESSES — MUST SELL QUICKLY



1500 TON S2-1500-240-60 BLISS DOUBLE CRANK STRAIGHT SIDE PRESS. TWIN DRIVE, BACK GEARED TIE ROD FRAME, NEW 1956:
18" stroke; 44" shut height; Air clutch; Bed area 60"x240".

1600 TON MESTA STRAIGHT SIDE TWIN DRIVE, DOUBLE GEARED, TIE ROD CONSTRUCTION:
10½" stroke; 25⅞" shut height; Bed area 60"x228"; Spring cushion; Air clutch.

1800 TON #4E-16-252 BLISS MARQUETTE 4 PT.:
Suspension Straight Side; Tie Rod Frame; 16" stroke; 46" shut height; Bed area 70"x254"; Air clutch; Air Cushions (4).

2000 TON #22018 HAMILTON STRAIGHT SIDE PRESS, TWIN DRIVE, DOUBLE GEARED (2):
14" stroke; Bed area 70"x222"; 40" shut height; Air clutch; Air Cushion.

INTERSTATE MACHINERY CO. INC.
1421 W. PERSHING RD. • CHICAGO 9, ILL., U. S. A.
CABLES: "INTERMACO" YARDS 7-5800
